Skills

Profile

Accomplished Senior Software Developer with 10 years of experience leading projects by acting as architect, developer and programmer analyst. Proficient in supporting project deliverables and maintaining releases. Strong leader in guiding support teams and solving complex issues. Steadfast in planning and implementing effective development strategies based on industry best practices.

Employment History

Senior Software Developer at Wood Mackenzie, Gurugram

DECEMBER 2024 — PRESENT

- Led critical enhancements in the Data Platform Console (DPC) using Python, FastAPI, and Django, integrating **GenAI-powered** workflows (OpenAI, Copilot) through **AWS Bedrock (AgentCore)** and custom **Software Development Kit (SDK)** integrations, enabling automation of schema enforcement, incremental versioning, and intelligent file tracking.
- Designed and implemented **GenAI-driven RAG architectures** leveraging PostgreSQL/Redshift for contextual data retrieval, significantly improving data discovery and internal analytics workflows.
- Built and deployed scalable microservices on AWS EKS, integrating MCP/LLM Gateways (Kong) and leveraging **AWS Bedrock** services with a reusable **SDK layer** to manage secure, governed access to AI capabilities across enterprise applications.
- Developed and maintained CI/CD pipelines using Terraform and Jenkins (Groovy), automating infrastructure provisioning and application deployment with Infrastructure-as-Code best practices.
- Engineered real-time, event-driven data pipelines by integrating AWS Lambda, Snowflake external functions, and event triggers for dynamic data validation and downstream analytics.
- Implemented secure access control and enterprise authentication using IAM and Okta, ensuring compliance with governance and audit standards.
- Established observability and monitoring using CloudWatch and Splunk, enabling proactive issue detection and performance optimization across distributed systems.
- Managed scalable AWS services including S3 (data lake), DynamoDB (metadata store), SNS/SES (notifications) for highly available and resilient platform operations.

Senior Software Developer at Kelp Global, Mumbai

JUNE 2021 — DECEMBER 2024

- Led end-to-end design and development of a Private Equity decision-making platform, integrating **GenAI and RAG pipelines** in the infrastructure to enhance financial insights and automation.
- Built intelligent data retrieval systems using **RAG (PostgreSQL/Redshift + Vector DBs)**, enabling advanced semantic search and deal analysis across large financial datasets.
- Designed scalable backend services deployed on **containerized environments (EKS)** with secure API exposure via **LLM Gateways (Kong)** for controlled AI access.
- Architected robust ETL pipelines using **Python and Apache Airflow**, enabling scalable and reliable data processing on Azure for large-scale financial datasets.
- Integrated complex financial data sources including **S&P Capital IQ**, building adapters and transformation layers for unified analytics.
- Implemented advanced NLP solutions using **Hugging Face**, including sentiment

analysis and co-occurrence networks for leadership and market intelligence insights.

- Delivered a high-impact Private Equity front-office platform to major clients, generating **\$1M+ annual revenue**, improving performance, scalability, and user satisfaction.

Software Developer at US Tech Solutions, New Delhi

AUGUST 2020 — JUNE 2021

- Developed backend services for job listing module in 'Simply Vendor Management System' recruitment software using Python
- Implemented Celery and Docker for efficient processing and scalability
- Architected messaging services via AWS SES & SNS for effective communication
- Proficiently worked in Python, Rest APIs, Javascript, and AWS environment
- Integrated APIs, created middlewares, and implemented dynamic template rendering
- Interfaced with customers, dealers, and sales representatives to address service and scheduling needs

Software Developer at Renewbuy, Gurugram

JUNE 2019 — JULY 2020

- Collaborated with top financial institutions, including HDFC, ICICI, Reliance, Royalsundaram, Liberty, Digit, TATA, and Shrirambank, to seamlessly integrate their services into the RenewBuy platform
- Successfully implemented an efficient queue architecture using SQS and Celery framework, ensuring optimal processing and improved system performance
- Effectively collaborated with cross-functional teams to understand the specific requirements of each financial institution and ensured seamless integration of their services into RenewBuy's ecosystem

Software Developer at Global Hunt , New Delhi

NOVEMBER 2017 — JUNE 2019

- Led the development of an External Portal (Recruitment System) using Python, Django, DrfApi, ElasticSearch, AWS (Cognito Authentication, SES & SNS), MongoDB, and MySQL
- Successfully managed the entire Recruitment process, including storing Job Seekers details, scheduling interviews, assigning interviewers from department heads, collecting interviewer feedback, and finalizing candidate results
- Leveraged a versatile tech stack, including AWS services for authentication and communication, to ensure a seamless and efficient recruitment experience

Software Developer at National Informatics Center, Govt. of India, New Delhi

AUGUST 2016 — NOVEMBER 2017

- Spearheaded the development of an efficient Online Conference Hall Booking System using PHP and Postgres for the National Informatics Centre
- Headed the development of an advanced Online vigilance clearance system using PHP and Postgres for the National Informatics Centre
- Enabled users to conduct virtual meetings and track session history with ease

Education

B.Tech, West Bengal Technical University, Durgapur

JULY 2012 — APRIL 2016

Graduated in Computer Science & Engineering

Senior Secondary Degree, Raisina Bengali School, New Delhi

JULY 2010 — APRIL 2012

Completed XII Boards.
